

Zoe Eather

MOTIVATIONAL | TECHNOLOGY
KEYNOTE SPEAKER

It's time to put a human lens on
technology trends for the sake of
yourself and your business.

Key Takeaways:

- Leveraging tech trends to create impact
- How to shape the future you want
- Unlocking your 'Possible Brain'

HUMAN LENS ON TECHNOLOGY TRENDS

Change is happening whether we are involved or not. And there is enormous pressure for businesses, government, and every single one of us to follow and get involved with the **tsunami of technology trends** seemingly about to crash on top of us. This is overwhelming.

Focusing on technology for the sake of technology builds **barriers to unlocking what is possible** because it misses a fundamental piece - the humans! Technology doesn't happen by itself it's a product of the human brain, therefore it's time to put a **human lens on technology trends** to unpack what we actually need to know and how we **create our own impact** by getting involved in the future, today.

ABOUT ZOE EATHER

An engineer and data scientist with extensive global experience, Zoe **takes the overwhelm out of the technology** conversation. She does this by sharing stories and insights which will surprise, engage and educate your audience about what is possible through technology and data when you look through a human lens. Zoe's insights will leave your audience with useful tools which they can instantly use to **think differently, ignite new ideas** and **unlock their potential** to adapt in an ever-changing world.

“ Zoe is amazing at bringing people together, inspiring change through collaboration and fresh thinking... with strong technical expertise to back her up!

Priscilla Radice, CEO, Infrastructure Association QLD
